

6 Choose Additional Output (optional)

Choose additional output channels on which you want your message to be displayed (App, Facebook and/or Twitter). When selecting the App as an output, you can also choose for your message to be send out as push notification. Social Interaction features such as Likes, Dislikes and Comments can also be switched on or off.

7 Set Duration

The amount of time that a message is displayed is set at 20 seconds by default. The duration can be adjusted manually.

8 Select Transition

Choose the transition that fits your presentation from a wide array of transitions.

9 Schedule Message

Click on 'Schedule message' to set the date and time of your message. If you do not set a date or time, your message will be visible from the time of scheduling until you manually deactivate or delete it.

10 Publish Message

- In the Preview you can see exactly what your message will look like. Satisfied with the result? Just click the 'Save' button. You will be redirected to the Message Overview where you can change your Message's status to ON
- Click 'Publish' in the upper right corner to publish your message
